What is a mobile light tower?

A mobile light tower is ideal for temporary projects, such as construction sites or events, as well as for situations without fixed infrastructure, such as poles, walls or power supply.

How a mobile light tower works?

Then an autonomous light tower is the ideal solution. This tower runs on batteries and, where possible, is supplemented with solar energy. After a few days, the mobile light tower is retrieved and recharged. Good site lighting ensures that employees can work safely and effectively.

Do you need a mobile light tower?

On sites without fixed infrastructure, such as posts, fences or walls, there is often still a need for lighting. In such cases, a mobile light tower offers the ideal solution: it is easily movable and quick to install. What are the advantages of a mobile light tower over fixed lighting?

How many m<sup>2</sup> can a stalico light tower illuminate?

Exactly how much area you illuminate depends on the terrain, but one STALICO® light tower can typically properly illuminate about 2,000 m<sup>2</sup>. How quickly are mobile light towers deployable? After delivery, a mobile light tower is installed and operational in about ten minutes. How do I control automatic turning on and off of mobile lighting?
