What is a 42U server rack?

A 42U rack refers to a server rack that occupies 42 units of vertical space. These racks are typically used in data centers for mounting servers and other equipment. What is the height of a 42U server rack? The height of a 42U rack is 73.5 inches (1866.3 mm), as each unit (U) is 1.75 inches (44.45 mm), and 42U is forty-two times that.

How do I choose a 42U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 42U rack or cabinet can house equipment whose total height when placed into the rack is no more than 1.87m. Care therefore has to be taken when selecting a rack to make sure that the cabinet height is sufficient to house the IT server, networking peripheral or IoT device.
