The Austrian solar photovoltaic (PV) industry is up in arms over the likely decision of the soon-to-be-formed coalition government, comprising ÖVP, SPÖ, and NEOS, to prematurely ...

PV Austria argues that the abolition of VAT and other measures planned by Austria's new government will only strengthen bureaucracy in the solar market of the country.

The export value of PV modules from India increased by more than 23 times in just two years between FY2022 and FY2024. Several factors have contributed to this rapid increase in PV exports from India ...

Austria's photovoltaic (PV) sector saw a 20% decline in capacity expansion in the first quarter of 2025 compared to the same period in 2024, according to PV Austria.

Discussions about Austria's dependence on Russian natural gas combined with a growing climate debate as well as uncertainty about the future development of electricity prices were the most ...

"Those now strangling PV and energy storage companies will later face massive job losses and will have to pay exorbitant prices to import electricity from abroad." PV Austria attributed ...

In the first three months of 2025, Austria installed just under 500 MW of new PV systems. This figure is about 20% lower this year than in the same period last year, according to estimates by the Austrian ...

As part of the latest Austria renewable energy news, these regulations are designed to encourage more power purchase agreements (PPAs) for solar PV projects by allowing them to ...

PV Austria described the shortfall as "massive" and warned of declining demand, lost orders, and mounting risks for the industry. By comparison, Austria added 1,419 MW in the...

Unfavorable weather conditions in Austria led to a decline in electricity generation from wind power,

Austria downgrades PV module exports

photovoltaics (PV), and hydropower. Wind energy was hit particularly hard, with output ...
