Battery Voltage Measurements Are Just Approximation Measure Battery While "At Rest" "Open Circuit" Battery Voltage vs Temperature Hydrometer Battery Measurement Tip Keep Lead Acid Batteries Above 50% State of Charge The Voltage of A Fully Charged Battery Is Not The Charging Voltage Battery voltages are temperature-dependent. In fact, good charger systems (alt-energy systems) have temperature compensation built-in via a temp probe on the battery. The voltage data in the chart below is based on manufacturer specs. (temperature within the vicinity of room temperature).
