-----

Fueled by the creative spirit and expertise of our world-class research and development team, we are at the forefront of the Photovoltaic (PV) and lithium battery industry, driving innovative solutions that ...

These ranged from setting standards for swappable batteries in small e-mobility to advancing solid-state research and rolling out large-scale energy storage systems.

Nascent Batteries will be providing research funding to kick off a series of innovative activities aimed at pioneering developments in sodium-ion batteries (NIBs) and lithium-ion battery ...

This innovative platform is designed to rapidly accelerate the adoption of battery energy storage systems (BESS) across the region, bringing together vital human and financial resources to ...

The Electric Mobility Research and Development Group is composed of R& D teams from the Electrical and Electronics Engineering Institute whose work involves electric vehicle technologies and solutions.

Formally set up in May 2022, Nascent has joined the charge, so to speak, into a field just beginning to be explored among local entrepreneurs: battery energy storage. Filipino consumers ...

The country is now eyeing at developing economical lead-acid batteries with optimal performance capacity as a better alternative energy storage to lithium-ion that can eventually be ...

Nascent Technologies has commenced the renovation of its laboratory and office located at #60 Kundiman St., Quezon City. The three-storey R& D building is being transformed to meet ...

ABC PH explores development in different battery chemistries through a multi-disciplinary approach.

The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future.
