For a list of the country's commercial-scale wind energy sites, plus solar energy and energy storage projects over one megawatt in size, see CanREA's most recent table of project data:

Most of the solar power generating potential in Canada is located in the south in Alberta, Saskatchewan, and Ontario. Canada has an overall maximum capacity factor of 6%, compared to 15% in the US.

This web mapping application gives estimates of photovoltaic potential (in kWh/kWp) and of the mean daily global insolation (in MJ/m² and in kWh/m²) for any location in Canada on a 60 arc seconds ~2 ...

Data and information about Solar power plants and their location plotted on an interactive map of Canada.

Find out where your province and city are ranked in terms of solar energy potential. With charts and maps you will easily be able to make comparisons across Canada.

Complete solar power guides and rankings for every province and territory in Canada. Based on incentives, sunlight levels, installation costs, and more.

Of the total global solar PV capacity, 0.38% is in Canada. Listed below are the five largest active solar PV power plants by capacity in Canada, according to GlobalData's power plants database.

Get to know the projects' power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of developer, year of connection to the electric ...

This is a list of photovoltaic power stations in Canada with a nameplate capacity of 10 MW or more.

In her first article for pvbuzz, Sofia put together Canada's top five largest operational and under construction solar installations. Going through the list, you'll notice that the largest facilities ...
