Compare the network coverage of mobile operators and check their performance at home !

The only remaining outlier, the Netherlands, recently held an auction after the report was published. As a result, this band has now been assigned in all EU Member States.

The 5G Base Station Market is undergoing a period of unprecedented expansion, driven by the escalating global demand for ultra-high-speed connectivity and low-latency communication.

The Netherlands 5G base station construction market is growing at a rapid rate as the nation advances its 5G rollout plans. With increasing demand for fast connections, the requirement for strong ...

5G is not yet available everywhere in the Netherlands. While many urban and densely populated areas have access to 5G, coverage in rural regions is still limited.

Comparison of the number of 5G base stations in the European Union (EU) and selected countries worldwide in 2024 [Graph], European 5G Observatory, June 30, 2024.

The market for 5G base stations is rapidly expanding, driven by the increasing adoption of IoT devices, smart cities, and autonomous vehicles. By 2025, the Netherlands is expected to be ...

Note: The following countries do not have base stations in the 26 GHz band: Austria, Belgium, Cyprus, Czechia, Greece, France, Hungary, Ireland, Lithuania, Latvia, Luxembourg, Malta, the Netherlands, ...

Perhaps surprisingly, many of the expected new base stations are necessary to fulfil coverage requirements set by the Dutch government. A much smaller number (16-36 sites) are ...
