What are ground-mounted solar panels?

Unlike typical solar panel systems, ground-mounted panels are, as the name suggests, mounted on the ground instead of on your roof. Although they're more commonly used for solar farms, they can also be used in domestic solar panel setups.

Should you choose a ground-mounted solar panel system?

In many cases, the best option is a ground-mounted solar array for your home or business. While rooftop solar panels are the most common choice for homeowners, there's quite a few reasons you should take the time to consider a ground-mounted solar panel system instead.

Are ground-mounted solar panels a good alternative to rooftop solar?

If you have large, sun-drenched yard, a ground-mounted solar panel system could be a great alternative. Ground-mounted solar panel systems usually cost about 34% more than rooftop solar, according to 2025 EnergySage data. You need a lot more equipment, which adds up.

Can garden solar panels be expanded?

Potential for expansion: Garden solar panel systems can be expanded more easily than roof-mounted systems, allowing homeowners to increase their solar capacity as their energy needs grow. The primary advantage of garden solar panels is their incredible flexibility.
