---

GlobalData estimates that global thin-film module capacity will reach 26.69GW and a market value of \$102.76bn in 2023. Considered second-generation solar cells, thin-film cells perform ...

Technology Comparison and Market Outlook: Benchmarking analysis of thin film technologies across efficiency, manufacturing complexity, cost structure, reliability, and environmental factors, with ...

Global solar PV manufacturing capacity by segment, 2015-2024 - Chart and data by the International Energy Agency.

Manufacturers have focused on scaling production capacity for CdTe panels due to their favorable manufacturing economics and competitive levelized cost of electricity (LCOE) compared to ...

Thin film solar modules held a share of two percent of the total production. The production of solar photovoltaic modules worldwide reached approximately 612 gigawatts in 2023.

The global Thin-Film Photovoltaic Market was valued at USD 6.2 billion in 2024 and is projected to grow from USD 7.1 billion in 2025 to USD 12.4 billion by 2029, at a CAGR of 15.1% during the forecast ...

Cadmium telluride (CdTe) thin-film PV modules are the primary thin film product on the global market, with more than 30 GW peak (GWp) generating capacity representing many millions of ...

The global Thin-film Solar Cell Market has matured with over 45 gigawatts (GW) of thin-film modules shipped in 2023 and more than 12 % of global photovoltaic manufacturing capacity ...

The global thin film solar PV market is segmented by Type, Substrate, Installation Type, Application, and geography. By type, the market is segmented into cadmium telluride, perovskite thin ...

# Global thin-film solar module production capacity

Thin film photovoltaics market size was valued over USD 7.14 billion in 2023 and is estimated to grow at a CAGR of over 16.5% between 2024 and 2032, driven by technological innovation and R& D ...
