Power Generating Equipment Utilization: Wind Power: Heilongjiang data is updated yearly, averaging 2,209.000 Hour from Dec 2016 (Median) to 2022, with 7 observations. The data reached an all-time ...

Generalities Wind farm name: Heilongjiang Huma Country: China County / Zone: Heilongjiang

By the end of June 2015, Heilongjiang grid wind power installed 14.73 million kilowatts, a total of 478.425 million kilowatts, an increase of 16.26%, accounting for 18.97% of the total installed ...

Looking for archive data?

The power grid of Heilongjiang Province actively carried out optimized dispatching of water, fire, and wind, strictly implemented the requirements of the State Electricity Regulatory Commission on wind ...

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

The project is developed and owned by Heilongjiang Huaifu Wind Power Fujin. The project generates 111,044MWh electricity thereby offsetting 132,553t of carbon dioxide emissions (CO2) a year.
