At the foot of BIG HQ, BIG's Landscape team has transformed a former parking area into a 1,500 m² public park and promenade, inspired by the sandy beaches and the coastal forests of Denmark.

Explore architecture projects by Bjarke Ingels Group.

BIG has grown globally since 2005, with 60+ buildings in 10+ countries. Join our 700+ person team shaping the future of architecture and design challenges.

Bjarke Ingels - Founder & Creative Director, BIG The facade design is inspired by the punched windows seen in the historic warehouses of the Meatpacking and West Chelsea neighborhoods.

Forty kilometers from Mongolia's capital city on open grassland steppe, lies one of Mongolia's largest solar power plants -- a 15 MW array with over 15,000 photovoltaic panels.

Explore Mongolia solar panel manufacturing with market analysis, production statistics, and insights on capacity, costs, and industry growth trends.

Until now, the largest in use solar power plant (Xinjiang solar farm) has an annual energy output of 6.1 billion kWh with a max. power of 5GW. So the new plant should be able to have an ...

BIG (Bjarke Ingels Group) is a multidisciplinary design firm specializing in architecture, engineering, and planning with a focus on innovative and sustainable projects.

Data and information about Solar power plants and their location plotted on an interactive map of Mongolia.

Mongolia has a target of 30% renewable energy capacity by 2030, reflecting the country's commitment to transitioning to a low-carbon, green economy as outlined in the Vision 2050 strategy.

How big is a solar panel in Mongolia

BIG has grown organically over the last two decades from a founder, to a family, to a force of 700. Our latest transformation is the BIG LEAP: Bjarke Ingels Group of Landscape, ...

Shaped by the movement of the water, the surrounding park is designed by BIG Landscape and manages storm surges through sloping terraces, vegetated dunes, and wetland gardens that slow ...

Mongolia has connected a 10 MW solar farm to the grid, as part of a plan to deploy 40.5 MW of solar and wind capacity in the nation's western regions.

In Chaideng village in Ordos city, Inner Mongolia autonomous region, 3.46 million blue solar panels stretch across the desert, covering 30 square kilometers, transforming the endless ...

We hope Bay View will provide a quantum leap in the evolution of the workplace, elevate the benchmark for sustainable design, and inspire the next generations of users and visitors to the building." Leon ...

Its area reaches 18,600 hectares with a length of 400 km and a width of 5 km. This reflects the commitment to optimizing the available natural resources for renewable energy. Behind the grandeur ...
