How much does a solar inverter cost?

Solar inverter replacement costs range from \$150 to \$350 for a microinverter and from \$800 to \$2,500 for a string inverter. This equipment converts direct current energy into alternating current energy. In the case of the micro type, each panel has its own inverter. String inverters, on the other hand, serve the entire system.

Do solar inverters have a warranty?

Most solar inverters include 5-25 year warranties covering manufacturing defects and component failures. However, warranties typically exclude labor costs, shipping, and damage from external causes. Repair versus replacement decisions depend on your inverter's age, warranty status, and repair costs.

Should I repair or replace my inverter?

Repair versus replacement decisions depend on your inverter's age, warranty status, and repair costs. Generally, repairs costing more than 50% of replacement costs may favor replacement, particularly for older units approaching 8-10 years.

How much does a solar panel repair cost?

This article was updated using automation technology and thoroughly reviewed for accuracy by HomeAdvisor Editor Ryan Noonan. Solar panel repairs cost an average of \$856, with most homeowners spending between \$230 and \$1,511.
