How to install a solar panel bracket?

To install a solar panel bracket, apply adhesive to the upper side of the bracket (this is where the solar panel will be positioned). Position and press firmly the side bracket along the side of the solar panel and repeat this process with the other side bracket. Allow the adhesive to dry as per the product specifications.

How do solar panel brackets function?

Solar panel brackets function by being installed through fastening bolts or applying adhesive on the mounting rails onto a flat surface. Solar panels should be installed at an angle to allow the cells to receive as much sunlight as possible.

How to install a solar panel?

To install a solar panel, first apply adhesive on one of the corner brackets. Align it to a corner of the solar panel and press firmly. Repeat this step for the other three corner brackets. Let the adhesive dry according to the product specifications.

How do you mount a solar panel?

To mount a solar panel, use the wing nuts, flange nuts, and module bolts to fasten the solar panel to the panel mounting rails. Ensure the rail size for your mounting system is different if not 22-28 inches. Double check to ensure the panel is secure and then use the wing nut and knob to connect the panel mounting rails to the surface mounting rails.
