Clean Energy Growth: India overtakes Germany, now ranking third globally in wind and solar power generation, reflecting rapid renewable energy expansion.

India ranked as the world's third-largest producer of electricity from wind and solar energy in 2024, leaving behind Germany, according to a report released on Tuesday.

In India, clean sources accounted for 22 per cent of the electricity generation. Hydropower contributed the most at 8 per cent, while wind and solar together accounted for 10 per cent.

Excluding Nuclear Capacity of 100 MW, which is under outage for very long time, and have been removed temporarily w.e.f. 31.05.2025. For more details, Click below.

Wind and solar electricity generation in India rose at the fastest rate since 2022 over the first half of the year, with their combined share representing over 17% of the subcontinent's...

India achieved record generation of solar and wind power in the first half of 2025, highlighting the country's push towards renewable energy and a cleaner power mix.

Clean Energy Growth: India achieved record solar and wind power generation in the first half of 2025, significantly reducing carbon emissions and exceeding electricity demand growth. Solar ...

India surpassed Germany in 2024 to become the world's third-largest wind and solar electricity producer, contributing 10% to global clean energy generation.

India is poised to continue its upward trend in clean energy, focusing on smart grids, battery storage, and hybrid systems combining solar and wind power. Innovations in hydrogen fuel, ...
