An Industrial fanless Embedded Box PC Intel J4125 by ITD are compact embedded box PCs, designed for edge computing, machine vision and other industrial applications. They offer a wide range of I/O ...

Intel Celeron Quad Core processor Fanless Industrial Computer, Intel Celeron J4125 Quad Core processor Quad core quad threads Fanless computer, Small size, durable cpu performance, Applied ...

It supports Auto Power On/Wake On LAN/PXE boot. This micro pc has a compact size, just 7.8 x 4.9 x 1.9 inch, and it also has a VESA mount bracket, you can hang it on the back of the monitor, which ...

Your search for a versatile, fanless industrial computer with the Celeron J4125 processor may find its match in the HYSTOU Mini, but dig deeper to uncover its true potential.

QBiX-GLKB4125-A1 is powered by Intel's Celeron J4125 Processor to provide 'low power but high performance' feature. It is designed with full range 12V-19V DC power inputs for operating ...

Our Industrial Mini PC J4125 is designed to deliver stable performance, low power consumption, and durability in harsh environments. Powered by the Intel's Celeron J4125 processor, it supports ...

MPCX-J4125-6COM, Intel's Industrial embedded Computer Model: MPCX-J4125-6COM Industrial Embedded Computer with Intel's Celeron J4125

The hardware systems of IPCs are very rugged, and they can adapt to harsh industrial field environments such as strong vibration and high temperatures. At the same time, the use of IPC ...

J4125 solar container communication station inverter automation micro industrial computer

With a variety of high-definition display interface to meet the needs of a variety of applications interface to provide a variety of work efficiency, widely used in industrial control, military, communications, ...

OAI - Quiet cooling J4125 mini industrial computer manufacturer & producer based in China, we operate from a factory with extensive experience. We invite you to explore OEM and ODM solutions with us.
