Explore real-world case studies of photovoltaic installations that highlight successful applications, challenges, and solutions in solar power projects.

Latest news on the solar energy and photovoltaics industry in the USA: installations, manufacturing, markets & policy, and technology.

In 2023, California led with more than 37 GW of installed solar photovoltaic (PV) capacity, providing about 30% of the state's electricity. California has strong legislative underpinnings and a good ...

As more homeowners take legal action against solar panel lenders for misrepresentations and failed warranties, many are eager to understand the latest results in these cases.

These advances are making solar technology more powerful, affordable, and versatile, accelerating the adoption of solar energy technology across residential, commercial, and utility-scale ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and market evolution from 1992 to 2024.

Photovoltaic (PV) technology has become a cornerstone in the global transition to renewable energy. This review provides a comprehensive analysis of recent advancements in PV technology and ...

We are here to bring you the latest solar news, progress and innovations, and everything else that you need to and want to know about the solar industry.

The latest technology insight report from the EPO's Observatory on Patents and Technology reveals that innovation in photovoltaics has experienced significant growth over the last three decades.

o In addition to the reference case and eight core modeled cases, EIA also ran two alternative policy projection cases this year. - The Alternative Electricity case assumes that the EPA will roll back ...
