Program Overview Relevant Local Laws Solar Progress How to Participate Current Project Locator Through the Clean Energy Program, DCAS works to expand distributed energy resources, including solar PV and energy storage installations across the City's portfolio of properties. The City has established a goal of installing 100 Megawatts (MW) of solar photovoltaic (PV) on City-owned buildings by the end of 2030, and 150 MW by the end ... See more on [nyc.gov](https://www.nyc.gov) NYSERDANY-Sun Solar Program - NYSERDA Review approved solar contractors in your area and best practices when choosing a contractor to install solar at your home, small business, or multifamily building.

Explore research on how supportive policy allows rooftop solar to meet local energy needs, create jobs, and support electric grid reliability.

The project evaluates both theoretical solar availability (GHI) and practical energy output (PVOUT), helping to visualize which rooftops may be most suitable for solar photovoltaic systems.

UGE has completed its latest community solar project in New York City. At 847kW, it will produce enough clean electricity to power roughly 200 homes.

Search for a city, state, or zip code to see solar potential and impact across entire geographic areas. We currently have solar data for portions of 50 states and Washington DC.

Review approved solar contractors in your area and best practices when choosing a contractor to install solar at your home, small business, or multifamily building.

This comprehensive guide will walk you through everything you need to know about rooftop solar power, from understanding the technology to calculating your potential savings and ...

If you're not able to have a solar system on your roof, you can still join this program and get local green power - lower cost, lower carbon, plus benefits for the whole community, including jobs.

Local rooftop solar power generation

In 2024, DCAS assessed all City-owned buildings larger than 10,000 gross square feet for solar readiness and identified nearly 29 MW of rooftop solar potential. As of 2024, the Clean Energy ...

NY SOLAR MAP estimates rooftop and ground mount solar electric potential (PV panels) and connects you to local solar resources.

New York has a successful track record of rapidly deploying rooftop and community solar, and these systems are uniquely capable of delivering direct utility bill savings to low-income families and renters.
