A system for controlling a microgrid includes microgrid assets and a tieline for coupling the microgrid to a bulk grid; and a tieline controller coupled to the tieline. At least one of the microgrid ...

A microgrid self-triggering control method and system for resisting FDI attacks is provided.

The present application discloses a microgrid control method and apparatus, a microgrid, and a storage medium.

The invention provides a micro-grid control method, which is used for solving the technical problem of complex micro-grid power control in the prior art.

A control method and micro-grid technology, applied in the direction of AC network load balancing, single-network parallel feeding arrangement, etc., can solve the problems of complex ...

Microgrids are part of a structure aiming at producing electrical power locally from many small energy sources, DGs. In a microgrid, a DG is often connected via a converter which controls ...

Abstract: A method for controlling power in a microgrid that includes power sources, loads and at least one connection to a main grid where a transformer is arranged to transfer electric power between the ...

Abstract: Search on patent applications for microgrid control technology was conducted on a global scale, analyzing the development lifecycle, main applicants, technology development direction, ...

One aim of the invention is then to propose a method for controlling a hybrid microgrid that allows the proportion of renewable power sources to be increased without affecting the stability of said grid.

According to an aspect of the present invention, there is provided a control method performed in a microgrid.

Microgrid control method patent summary

The microgrid comprises at least one electrical power source, e.g. an...
