Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.

Looking at historical data, project pipelines and numerous (often highly optimistic) announcements of future plans and targets, large differences among countries are observed, indicating that the energy ...

In a region of the world renowned for its vast and substantial oil and gas reserves, several nations in the Middle East are shifting their energy sectors towards hybrid wind-solar-storage mega ...

The region's most significant wind power projects - those recently constructed, newly underway, and in the pipeline - show how it is reshaping its broader energy mix.

These top 10 wind energy projects highlight the region's shift towards renewable energy and its potential to become a global leader in clean energy production. The Middle East is rapidly ...

This is the largest operational wind farm in the Middle East and Africa. This milestone follows the completion of the 150 MW expansion, four months ahead of the initial schedule, which ...

A collaboration of NEOM, ACWA Power and Air Products, it combines onshore solar, wind and energy storage, targeting 600 tons of daily green hydrogen output by 2026.

The Saudi Arabian power producer and developer has signed a joint development agreement with Gotion Power, Chinese battery manufacturer Gotion High-Tech's subsidiary in ...

This project, part of 297 contracts worth \$8.6 billion, supports Vision 2030's 50% renewable electricity target by 2030, reducing grid volatility and enabling 24/7 solar dispatch.

Middle East Windmill Energy Storage Project

A new analysis by DNV finds that the Middle East is entering a period of rapid renewable power growth, led by very large solar projects and the increasing use of energy storage.
