In the Netherlands, engineers have created a striking solution to clean energy: a "wind tree" covered in hundreds of tiny rotating leaves.

As reported by Change Inc., production is set to commence in late 2025, and The Blade will be priced at EUR 2,500 (excluding VAT, pole and installation), positioning it as an accessible ...

Along the dikes of the IJsselmeer on the west side of the Noordoostpolder lies one of the largest wind farms in the Netherlands with a total of 86 wind turbines on shore and near shore. The wind farm ...

In the Netherlands, engineers have designed a futuristic "Wind Tree" that generates electricity using tiny artificial leaves instead of large spinning blades. Each leaf moves independently, allowing the system ...

This will require radical changes to how the country's energy system works, and this report sought to find out what the potential is for Smart Integrated Decentralised Energy (SIDE) systems, a highly ...

The Groningen Microgrid Project is a smart grid project located in Groningen, Netherlands.

New research suggests decentralized, smart microgrid systems are capable of providing most, if not all, of our future energy needs. The Netherlands is pioneering a new approach to ...

Characterized by a distinctive architecture of domes and glass panels, the Aardehuizen is a picturesque community of 23 homes located in Olst, Netherlands that was completed back in 2015.

Ons bedrijf is opgericht in 2010 en telt inmiddels 13 specialisten. De oprichters hebben sinds eind jaren negentig brede ervaring opgedaan met duurzame energieprojecten.
