---

This paper provides a state-of-the-art review of the most recent research on the different degradation modes of PV modules. Globally, PV waste is projected to make up 4 %-14 % of total ...

The Implementation Plan of the Nordic TSO strategy presents the prioritized measures under the selected strategic themes that the Nordic TSOs plan to initiate working on to start paving the way for ...

Meet Nordic Solar's Board of Directors and Management team, bringing diverse expertise and contributing to the company's development. Read more about their backgrounds here.

To establish a definition of the degradation rate for solar PV modules, inverters and PV systems that will be included in the preparatory study on Ecodesign and Energy-labelling.

Drawing on a wide range of academic studies, the paper systematically analyses the key factors affecting the performance of photovoltaic (PV) systems to provide in-depth understanding of ...

We develop, construct, and operate utility-scale solar parks across Europe on our mission to make everyone benefit from solar energy. As we pursue this mission, our vision is to emerge as one of the ...

Degradation rates must be known in order to predict power delivery. This article reviews degradation rates of flat-plate terrestrial modules and throughout the last 40years.

Just like there are different degradation rates of solar panels, there are factors that accelerate or reduce solar panel degradation. These include the materials used to manufacture PV ...

Each member of the Nordic Generation team is highly motivated to play their part in the energy transition and reduce greenhouse gas emissions associated with power generation.
