Until battery prices fall, energy markets mature, and currently non-monetizable energy storage services become monetizable, state incentives will be a necessary and critical key to increasing energy storage deployment.

USDA Rural Development provides loans and grants to help expand economic opportunities and improve the quality of life for millions of Americans in rural areas.

The mobile energy storage systems (MBESS) will serve as a new tool for emergency response across the region. The project will demonstrate the deployment across four to five sites within GMP's territory, utilizing ...

This structure provides an alternative for community entities that want to benefit from energy storage but might not want the potential burdens of financing, owning, and managing a battery energy storage system.

As of mid-2025, none of these rescinded orders have been replaced by equivalent initiatives. This rollback ends key interagency programs that supported clean energy and equity-focused investment, potentially reducing ...

The Rural Energy Savings Program (RESP) provides loans to entities who provide energy efficiency services in rural areas that agree to make affordable loans to help consumers implement cost-effective, energy efficiency ...

Overview of 40101(d) allowable projects that are likely to cost under \$500,000 and can be impactful against a range of outage threats, including both cost estimates and potential benefits for these ...

With the help of these partially forgivable loans, Midwest Electric, La Plata, and Trico Electric will be able to build their own renewable energy facilities, some for the first time, and implement battery storage ...

Payment for Low-Pressure Mobile Energy Storage Containers in Rural Areas

This document is for people who live or work in rural and remote areas and who are looking to plan or build clean energy projects in their communities. The guide provides an overview of many federal programs that offer ...
