PV Back Sheet - The PV back sheet is a photovoltaic laminate that protects the PV module from UV, moisture and weather while acting as an electrical insulator.

Epic Resins offers a range of specialized adhesives, potting, and encapsulation products for the renewable energy industry. Tailored to withstand diverse climates and conditions, these products ...

Renewable energy systems demand materials that combine mechanical strength, electrical insulation, chemical resilience, and lightweight form. Among such advanced materials, the ...

Our main products include fiberglass boards, epoxy resin boards, needle templates, anti-static boards, and high-performance density boards.

This durable bottom insulation plate is engineered specifically for use in 3.2V 100Ah LiFePO4 battery cells, ensuring proper spacing and insulation between cells and metal enclosures.

High-Temperature Resistance: Our 3240 epoxy board withstands temperatures up to 150°C, perfect for high-voltage applications like lithium battery packs and power systems.

SOLAR-TDB(TM) is a single ply of SG7115/SG7135 melt-encapsulation sheet to provide good thermal dissipative capability and more than 1500V insulation. It replaces both T/P/T and EVA in traditional ...

Epoxy boards are great for flexible photovoltaic backsheet uses because they are strong, don't conduct electricity, and can withstand harsh environments. These are all important factors for ...

Epoxy resin board is suitable for high-insulation structural parts for machinery, electrical appliances and electronics. It has high mechanical and dielectric properties and good heat resistance and moisture ...

Shop high-quality 1mm epoxy resin fiberglass boards from reliable suppliers. Enjoy durable, efficient, and

versatile solutions for your electrical needs.
