---

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box ...

1.Machine consists of glass handler and interleaf handler. 2.Machine consists of 2 positions for glass and 1 position for interleaf. 3.PU material for suction cup to ensure mark-free. 4.Single corner tilting ...

Full auto solar glass loading machine can grab the glass and place it on the conveyor line automatically - We provide solar panel production line, full automatic conveyor with full automatic laminator, full ...

Single corner tilting design to break vacuum suction during glass pick up. Air& electricity failure protection. With dust removing function.

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...

The automatic glass loading machine in a photovoltaic production line is the starting point and core equipment of the module encapsulation and lamination process.

The auto glass loader is an automated material handling system designed for solar panel and glass manufacturing lines. It ensures precise, high-speed loading of glass substrates onto production lines, ...

1.Applicable Module Size:1640-2600\*992-1500mm; 2.Feeding:suck glass automatically on the conveyor line,can set lack of material reminder; 3.Pick up paper:Pick up paper automatically and put it into ...

Its main products include high-efficiency solar street lights, solar water pumps, integrated home solar systems, high-performance lithium batteries, and high-quality PV panels.

# Photovoltaic panel automatic loading machine

Capable of handling frame sizes from 650 x 1400 mm to 1400 x 2500 mm (customizable), it ensures a quick framing cycle with both automatic loading and unloading processes.
