Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia.

Our BESS units are agnostic, scalable and safe, available in various models to meet a variety of power and capacity requirements of any project. Each model is built with performance, reliability, and ...

The compact and robust BESS can be deployed for floating platforms, vessels, and other industrial areas, resulting in huge fuel savings, reduction in vibration, noise, emissions, prolong maintenance ...

When the BESS is not in operation for an extended period, it is recommended for the BESS operator to store the battery in a cool and ventilated environment, and to recharge and discharge the battery ...

The addition of BESS is part of PLP's commitment to supporting Singapore's energy transition. The battery system is expected to improve grid stability and enhance operational flexibility.

The compact power blocks allow the connection of power cables at input or output of BESS sub-systems control panels such as PCS, central and solar inverters. They combine high performance ratings (up ...

Did you know a typical construction site can burn over 1,000 litres of diesel daily? At Grand Dunman, a new residential project in Singapore, that's changing; thanks to Infinity Cube's ...

Singapore's government and the Energy Market Authority (EMA) have announced significant upgrades to the power sector, including potential expansions of Southeast Asia's largest ...

Of the 11 ASEAN members, Singapore is taking the lead in the battery energy storage systems (BESS) space. Earlier this year, the city-state launched the region's largest battery energy ...

Singapore 2500 kW Communication BESS Power Station

We support over 650 gigawatts (GW) of renewable energy projects worldwide, including over 25 GW in Asia. Our Marsh Asia renewable energy team is a pioneer in the industry with an Asia-based BESS ...
