In this article, Richard Doyle, managing director of JUWI Renewable Energies South Africa, discusses the benefits, lessons and future of solar PV with battery energy storage for mining.

In this article, focus will be mainly put on thin film floating solar PV arrays, which do not require a pontoon for mounting since they are flexible and lighter. Figure 2 illustrates such a...

Inadequate energy supply has shifted the dynamic of solar energy development, as firms increasingly turn to renewable energies as one component of a basket of energy options used to maintain stable ...

We assess global open-pit mining sites as potential solar hubs, analysing their technical feasibility and deployment timelines under diverse future scenarios.

Explore the integration of photovoltaic systems in the mining industry. Discover how solar energy adoption is transforming mining operations by reducing environmental impact, enhancing ...

The first prototypes using solar cells consist of six-cell foldable Miura-Ori panels with dimensions of 376 mm × 527 mm. These prototypes serve to test the strength and durability of the ...

The Energy Storage Partnership is a global partnership convened by the World Bank Group through ESMAP Energy Storage Program to foster international cooperation to develop sustainable energy ...

Several new forms of photovoltaic (PV) installations have been proposed for advancing the deployment of solar energy while mitigating land-use conflicts. One prominent approach is ...

Improved encapsulation and alternative contact materials are being investigated to reduce cell degradation and push cell lifetimes to industry-relevant values. Learn more about the awardees and ...

Small-scale cooperation on photovoltaic cell cabinets for mining

Small scale solar facilities were successfully installed at our Randfontein corporate office as well as at our Nufcor plant. We constructed these facilities to reduce our reliance on the national power ...
