Automatic PV clamp, edge clamp and middle clamp machines integrate punching and cutting functions, serving as high-efficiency automated equipment for PV accessory production.

With the ability to punch multiple holes per stroke and shear beams in seconds, this machine will increase production speed, reduce labor costs, and enhance overall efficiency.

This machine has multiple processing to realize feeding, punching (single or double side), cutting and piece's ejecting at same time. Hole punching adopt hydraulic system with high pressure that allows ...

This machine is the right solution for aluminium solar panel mounting clamps blocks making. The working cycle is fully automatic, each piece production time is only 3~4 second. Servo driver high ...

Punching machines are used to manufacture lightweight yet durable frames for solar panels. By accurately perforating and cutting aluminum profiles, these machines make it easier to ...

PUMA 2HI is a manual punching solution for steel beams used in solar pile foundations and tracker structures. With up to 440 tons of force and up to 8 holes per stroke, it offers high productivity for ...

A precision machine designed for solar bracket fabrication, automating cutting and punching processes with high accuracy and efficiency, optimizing production in solar panel assembly.

A precision machine designed for solar bracket fabrication, automating cutting ...

Dega Machine: China professional manufacturers and suppliers of various solar frame automatic cutting and punching machine. You can source quality Solar Panel Frame Machine for sale with competitive ...

Engineered for efficiency and precision, our Solar Pile Machinery lineup includes specialized equipment for

Solar support punching and cutting machine

cutting, punching, bending, and processing steel piles used in ground-mounted solar installations.

Equipped with two punching units, the GR BEAM can execute two, four, or six punches in a single stroke, significantly increasing productivity. It can punch up to six holes per flange, making it an ideal ...
