What is China's most advanced wind turbine installation vessel?

[Photo/Xinhua]BEIJING -- A home-made wind turbine installation vessel, believed to be the most advanced in China, has been delivered in Yantai, East China's Shandong province, its producer China International Marine Containers (Group) Co Ltd (CIMC) announced.

What is the latest generation wind turbine installation vessel?

Two homegrown fourth-generation wind turbine installation vessels, the latest generation in the world, have been delivered in Nantong City of east China's Jiangsu Province. The vessels boast strong resistance to wind and waves and offer a 30-percent increase in installation speed compared with the third generation.

Can China develop offshore wind farms?

The delivery marks a major step forward in China's capabilities for developing offshore wind farms. Two homegrown fourth-generation wind turbine installation vessels, the latest generation in the world, have been delivered in Nantong City of east China's Jiangsu Province.

Which windfarm support vessel from Chinese shipyard Aulong Shipbuilding is the best?

The best of both worlds: The windfarm support vessel from Chinese shipyard Aulong Shipbuilding is SWATH catamaran. When the ship is in the wind turbines of the Jiangsu offshore wind farm near the east coast of China to transport maintenance technicians, tools or spare parts, it benefits from the catamaran design.

Named Nankun, the triangular structure was designed and developed by the Guangzhou Energy Research Institute of the Chinese Academy of Sciences in compliance to the China ...

The vessel, officially known as "Tiejian Wind Power 2000," is China's fourth-generation self-elevating and self-propelled vessel dedicated to wind turbine installation.

Named Nankun, the triangular structure was designed and ...

China has unveiled the Tiejian Wind Power 2000, a new, advanced vessel designed to install large offshore wind turbines. The vessel delivered on December 28, is described as the most ...
