How do I choose a solar roof lease?

1. Solar Roof Suitability Before entering into a Solar Roof Lease, it's crucial to assess the suitability of your roof for solar panel installation. Factors to consider include the roof's orientation, shading from nearby trees or buildings, and its structural integrity to support the weight of the solar panels.

Can solar panels be installed on your roof?

While a growing number of property owners are investing in the installation of solar panels on their roofs - a new group of small to independent developers began exploring the feasibility of leasing rooftops, attracting investors and raising the money to pay for the solar installations.

Should you rent a roof if you have a PV system?

As a result, in any rooftop lease agreement, you need to know who is going to pay if roof repairs are needed, especially if PV system removal is required. In simple terms, if maintenance is not an integral part of the lease agreement, roof rental is not likely to be a lucrative deal in the long run.

Should a property owner invest in rooftop solar?
