-----

Solar parks and grid-scale batteries are set to deliver significant new capacity to South Africa's grid in 2026. Several major renewable energy projects currently under construction will go ...

Globeleq and African Rainbow Energy finalise commercial agreements for a 153 MW energy storage project in South Africa, aimed at enhancing national grid stability and optimising peak energy ...

Norwegian renewable energy company Scatec ASA has been named the preferred bidder for the 123 MW/492 MWh Haru Battery Energy Storage System (BESS) project in South Africa.

South Africa advances grid stability with batteries Under a 15-year Power Purchase Agreement (PPA) with Eskom, the Oasis projects will leverage advanced battery storage technology ...

This project aims to decommission one of South Africa's oldest coal-fired power plants and replace it with 220 MW solar PV and wind power, as well as 150 MW battery storage. The funding comprises ...

The Red Sands project will be the largest standalone BESS to reach this stage on the continent, designed to store power during off-peak hours and release it when demand is ...

UK company Globeleq, the leading independent power company in Africa, yesterday announced that its Red Sands project in the Northern Cape has been awarded Preferred Bidder ...

The BESS project serves as a direct response to meet one of the urgent needs to address South Africa's long-running electricity crisis by adding more storage capacity to strengthen the grid ...

The battery energy storage initiative will significantly enhance South Africa's power infrastructure, alleviating grid congestion and increasing renewable energy integration.
