The photovoltaic string welding machine is mainly composed of a control system, a welding system, a cooling system, and a workbench. Its working principle is mainly to use high temperature to weld ...

The solar photovoltaic automatic string welding machine adopts infrared roller hybrid welding technology, which can fully automatically weld traditional and double-sided batteries, as well ...

AM050E MBB PV Cell Soldering Stringer is a fully automatic machine used to solder the mono-Si or poly-Si cells into a string. It can work with 156-230mm (3BB-15BB) cells, or 156-230mm (full, half-cut, ...

Automated multi-function laser welding platform designed for high-efficiency solar panel assembly, specifically engineered for 166-210mm battery cell welding with multi-busbar compatibility.

It is compatible with various welding modes such as 3BB and multiple main grids, with low mechanical stress, low damage rate, and easy maintenance. It is a key equipment for preparing efficient...

Solar panel string welding machine is mainly used for series welding of monocrystalline and polycrystalline cells in fully automatic crystalline silicon solar cell modules.

PV/Photovoltaic Module/Panel End Welding for PV Module String, find complete details about PV/Photovoltaic Module/Panel End Welding for PV Module String - Suzhou Eterphe Tech Co., Ltd.

To date, we have delivered 19 sets of 100MW photovoltaic module production line equipment and various self-developed stand-alone equipment to over 20 countries and regions worldwide.
