Does Iraq have a solar power plant?

The contracts also cover a water intake project for injection into oil reservoirs. The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

Will totalenergies build a solar power plant in Iraq?

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

How much solar capacity will Iraq have by 2030?

Iraq's solar plans announced in November 2021 call for the addition of 12 gigawatts of solar capacity by 2030. Some 7.5 gigawatts of the planned solar capacity are to come from utility-scale solar plants, and Iraq has reached agreements with developers - at varying stages - for projects that will add 4.5 gigawatts of the total.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

Search all the announced and upcoming solar photovoltaic (PV) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Iraq with our comprehensive online database.

The first phase of the Karbala solar power plant, totaling 22 MW, is now online. Its capacity is expected to reach 75 MW within the next two moves, ahead of a final 300 MW target.

Shafaq News/ Iraq has prequalified eight companies for solar energy projects under the first phase of a Central Bank-backed initiative, Electricity Minister Ziyad Ali Fadel said on Tuesday, ...

Iraq is now moving forward with the construction of its first large-scale photovoltaic solar power facility. The Iraqi government has increased its efforts to carry out a more ecologically friendly ...

What are the photovoltaic sites in Iraq

Iraq is finally proceeding with the country's first big solar power ...

Iraq is finally proceeding with the country's first big solar power plant. The Baghdad government has stepped up the effort to adopt a more environmentally sustainable energy policy that ...

Located in the desert in the central Karbala governorate, the project will be Iraq's first operational solar energy installation. According to Iraqi electricity minister Ziad Fadhil, it spans nearly ...

Renewable energies in Iraq: Bringing experts, policy makers and private sector together to leverage the potential of solar power for a greener future

Explore the solar photovoltaic (PV) potential across 35 locations in Iraq, from Duhok to Basra. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine ...

There are 50 Solar photovoltaic power plants in Iraq as of July, 2025. Download the latest data on Solar photovoltaic power plants in Iraq.

Iraq's high solar radiation, urgent power shortages, and growing infrastructure demand make it one of the most promising solar markets in the Middle East. From Baghdad rooftops to Basra's farmlands, ...
