---

With its record-breaking efficiency rates and vertically integrated manufacturing, Longi Green Energy Technology has become synonymous with high-performance solar solutions. Let's ...

Certified by the authoritative US National Renewable Energy Laboratory (NREL), LONGi self-developed large-area (260.9 cm<sup>2</sup>;) crystalline silicon-perovskite two-terminal tandem solar cell ...

Does Longi have a second generation BC panel? "Longi's first-generation BC products were primarily positioned for the rooftop market, but the second generation of BC is entirely different," the company ...

At a celebratory event held in Madrid, Spain, on the evening of the 7th of May, LONGi launched its all-new, flagship Hi-MO 9 module.

This new module, under the LR7-60HVHL model, featuring 120 HPBC 2.0 half cells, boasts a power output of up to 560 W and an efficiency of up to 24.8%, claimed the company.

HPBC (Hybrid Passivated Back Contact) is LONGi self-developed and named hybrid passivated back contact cell technology. It is a new generation of high-efficiency cell technology featuring no grid lines ...

Innovations also at the module level: In addition to several advancements at the cell level, LONGi's HPBC structure also supports line interconnections at the module level rather than Z-shaped ...

Longi presented its BC-based Module Hi-Mo 9 yesterday evening in Madrid, which uses silicon solar cells with a world record efficiency of 27,3 %.

Hi-MO X10 takes over the core technology of HPBC 2.0 cells. Peak of Crystalline Silicon First Choice for Value High Tech | Extreme Security | Higher Value | Extreme Aesthetics.

## What model is the LONGi BC photovoltaic panel

Chinese module manufacturer LONGI has launched a new back-contact (BC) lightweight module for commercial and industrial (C& I) rooftop applications. The Hi-MO X10 Guardian Light ...
