To effectively eliminate odors and restore the solar panel's optimal performance, various cleaning strategies can be employed. Implementing cleaning methods should prioritize safety, ...

What to do if there is paint smell on the photovoltaic panel

If the paint is oil-based, then use a brush to scrub the area with a mild dishwashing liquid. If the paint is water-based, then use a mixture of vinegar and water or a commercial cleaning agent like TSP.

Dip a soft-bristled brush into the solution and gently scrub the panel surface. For stubborn spots like bird droppings, let the solution sit for 1-2 minutes before scrubbing.
