---

As of 2025, there were over 10 thousand solar farms in operation in China with a combined capacity of over 447.51 gigawatts.

China is home to a number of the world's largest solar power plants. The East Asian nation, which is the largest emitter, has ramped up its share in the fast-growing renewable energy ...

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

Scientists led by the China Agricultural University have created a national-scale map and dataset of ground-mounted PV power stations in China. The data is based on Sentinel-2 imagery from...

An aerial photo, taken on January 6, 2025, shows a partial view of the Shichengzi photovoltaic-power station in Hami, in China's Xinjiang Uyghur Autonomous Region.

We provide a remote sensing derived dataset for large-scale ground-mounted photovoltaic (PV) power stations in China of 2020, which has high spatial resolution of 10 meters.

Overview Concentrated solar power History Solar resources Solar photovoltaics Solar water heating Effects on the global solar power industry Government incentives China has large potential for concentrated solar power (CSP), especially in the south-western part of the country. The highest daily mean values of direct normal radiation are found in the Qinghai-Tibet Plateau and Sichuan Basin, at 9 kWh/m<sup>2</sup>. Most of northern and western China has daily average direct normal radiation over 5 kWh/m<sup>2</sup>, considered the limit for economical use of CSP. Practical limit...

Data and information about Solar power plants and their location plotted on an interactive map of China.

# Which solar power stations are there in China

A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better solar ...

Get to know the projects" power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of developer, year of connection to the electric ...

Listed below are the five largest active solar PV power plants by capacity in China, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...
