Are solar panels worth the investment?

For more and more homeowners going solar, batteries are becoming essential, rather than a nice-to-have, for peace of mind and maximum savings. While solar works for most homeowners, certain situations make it less attractive or financially unviable. Here's when solar panels typically aren't worth the investment:

Can a solar panel installer take my old solar panels off?

Under EU regulations, your solar panel installer is legally obliged to take your obsolete solar panels off you at no cost - that's right, it shouldn't cost you a penny. They'll take your old panels to a designated collection facility before the panels go on to a recycling plant.

How much does it cost to install solar panels?

The up-front cost to install solar panels has fallen significantly over the years, but it isn't cheap. The average U.S. homeowner requires an 11-kilowatt solar panel system to cover their electricity usage. For a system that size, you can expect to spend just over \$22,000 in 2024, after federal tax credits.

Do solar panels add value if you move?

However, adding a solar panel system can still benefit you financially if you move. According to new research from SolarInsure, which looked at thousands of California homes, solar panels can increase your home's value by about 5-10%. Just be wary of leasing solar panels if you think you might move.

Solar panels can offer savings on your energy bills. Discover if solar panels are worth it for you and whether you can install them in your property with MoneySavingExpert.

Your neighbor just got solar panels and won't stop bragging about ...

Solar panels may be worth it depending on factors like the \$16,715 average cost, potential savings of \$10k-\$25k, and your home's location.

Homeowners interested in solar power should check their utility bill to tally how much they spend on electricity each year. In general, the more shelled out, the greater the possible savings ...

You don't have to spend money to install photovoltaic panels

Your neighbor just got solar panels and won't stop bragging about their \$12 electric bill. Meanwhile, you're still paying \$150+ every month and wondering if solar panels are actually worth ...
