The 100MW molten-salt solar thermal power plant, also called the "super mirror power plant" with its more than 12,000 heliostats, sparkles in the Gobi Desert in Dunhuang, northwest China's ...

This power station not only delivers a large amount of clean electricity annually, but also provides valuable technical experience and engineering demonstrations for the development of clean ...

China has reportedly developed the world's first dual-tower solar thermal plant near Guazhou County in Gansu Province to enhance efficiency and reduce carbon dioxide emissions.

A 100MW thermal solar and molten salt energy storage system in Xinjiang, China, is set to be completed and grid-connected by the end of the year, part of a project which has also deployed ...

China has unveiled the world's first dual-tower solar thermal power station in the Gobi Desert, using 27,000 mirrors to generate renewable energy round the clock, a landmark in clean ...

It's home to the nation's largest photothermal power plant, capable of storing solar energy for uninterrupted power supply. The power plant boasts a massive 100-megawatt installed ...

China has switched on a worldfirst solar thermal power station in the Gobi Desert that is said to be a cheaper and more efficient use of the technology with potential to be scaled up.

China has made a revolutionary breakthrough in renewable energy engineering after it just launched the world's first solar-thermal power plant that utilizes a dual-tower system to generate...

Dunhuang was chosen to be the home of this large-scale solar thermal power station because of its abundant sunlight resources. Meanwhile, the city's booming tourism industry also ...

A new dual-tower solar thermal plant in China uses thousands of mirrors to generate enormous amounts of
